

Case No. **XXXX**
Submitter **Jane Doe**

Report No. **xxxxx**
Test Type **Parentage**
Breed **Warmblood**
Report Date **5/11/2023**

Parentage Evaluation for the Mating of:

Sire
XXXXX
Fido

Progeny	ID No.	Interpretation
Foal	xxxxxx	Parentage does not qualify (Exclusion of sire)

These results are based on data obtained from analysis of unique DNA loci in accordance with the standards and protocols set forth by the laboratory. The accuracy of parentage interpretations is based on the information and samples provided by the client. The laboratory does not assume responsibility of errors due to mislabeled or incorrectly sampled submissions. Conclusions concerning parentage (in the absence of any supplemental client information) are derived based on a mating of two unrelated individuals.

The laboratory recommends that DNA samples from both the sire and dam be included in a parentage evaluation. If the sire or dam is not available for testing, the client should opt for extended testing using additional DNA markers. If these recommendations are not followed, the power to exclude an alleged parent will be compromised, thereby increasing the chance that the alleged parent will be falsely included as a biological parent.
